

THE NEXT BIG PUFF
IN CRYPTO

GEEKBAR

It's a smooth vape with many flavors that many people love

ABSTRACT

\$GEEK is igniting a crypto revolution flavored by America's favorite disposable vape. Born from viral demand and smooth tokenomics, Geekbar combines addictive GameFi mechanics with the 2% tax that rewards holders (1.5%) and burns supply (0.5%). No founders, no tricks - just pure community-driven vapor. Join the bar where crypto gets flavorful.

THE GEEKBAR PHENOMENON

VAPE MEETS BLOCKCHAIN

Geekbar took the U.S. by storm with its smooth hits and irresistible flavors. Now we're doing for crypto what it did for vaping: making it accessible, enjoyable, and impossible to put down.

WHY TOKENIZE A VAPE?

- ▶ **Cultural Momentum:** Leverage existing viral hype
- ▶ **Community Focus:** Reward loyal holders like favorite customers
- ▶ **Flavorful Utility:** Beyond memes - actual gaming rewards

"We hope to get it flowing back in US to keep customers happy" - Geekbar

TOKENOMICS

SUPPLY & STRUCTURE

- ▶ Symbol: **\$GEEK**
- ▶ Total Supply: 1,000,000,000,000
- ▶ Tax: 2% per transaction
 - 1.5% → Game Rewards Pool
 - 0.5% → Permanent Burn

ANTI-WHALE MECHANICS

- ▶ Renounced ownership → No rug pulls
- ▶ 100% LP tokens burned → Permanent liquidity
- ▶ Contract verified → No backdoors

The 0.5% burn isn't just smoke - it's deflationary pressure that makes every puff count.
